Supplementary Figure 1: The weekly intervention protocol based on graded progression of mental representation techniques.

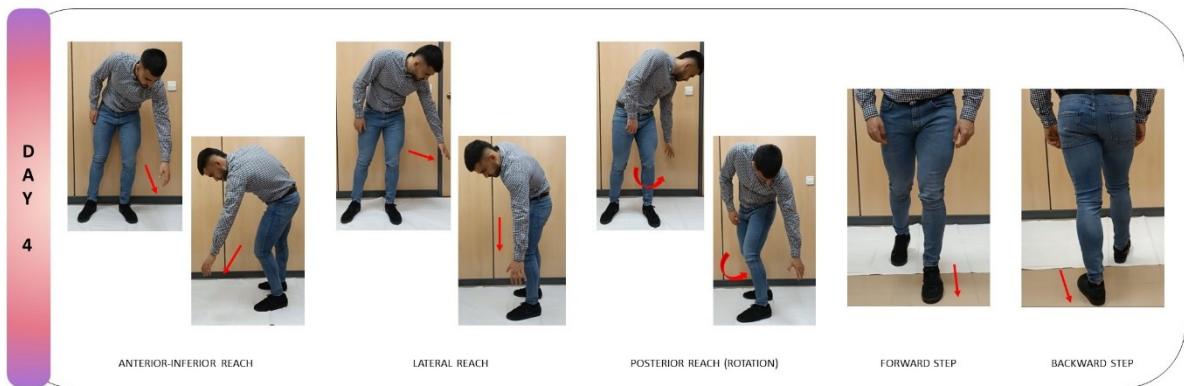

a. Representation of the Monday treatment protocol: Uniplanar and monoarticular movements (static sitting). ABD: abduction; ADD: Adduction; DF: Dorsal Flexion; FLEX: Flexion; ER: External Rotation; EXT: Extension; IR: Internal Rotation; PF: Plantar Flexion; PRONO: Pronation; SUP: Supination

b. Representation of the Tuesday treatment protocol: Multiplanar and/or multiarticular movements (dynamic sitting). ABD: abduction; ADD: Adduction; DF: Dorsal Flexion; FLEX: Flexion; EXT: Extension; PF: Plantar Flexion

c. Representation of the Wednesday treatment protocol: Sitting to standing transition and standing to sitting transition

d. Representation of the Thursday treatment protocol: Upper limb reach in standing position (static standing)

e. Representation of the Friday treatment protocol: Anterior-posterior stepping and walking (dynamic standing and walking)
